

# Market Basket Analysis & Recommendation System

FiILZAHANTI NUHA RAMADHANI

# Overview

The H&M Group is a brand and business family with 53 online markets and approximately 4,850 stores. H&M's online store provides customers with a wide range of products to choose from.

Product recommendations are essential for improving the shopping experience. More importantly, assisting customers in making the best decisions has a positive impact on sustainability because it reduces returns and thus reduces transportation emissions.

# EXPLORATORY DATA ANALYSIS (EDA)

## Top 10 Bestselling Products

## Top 10 Bestselling Product Types

# EXPLORATORY DATA ANALYSIS (EDA)

Bestselling Product Types Each Month

## Observations

Sweater, trousers, or dress are the most popular products each month from 2018 to 2020.

# EXPLORATORY DATA ANALYSIS (EDA)

Top 5 Best Selling Product Types from August 2018 - August 2020

## Observations

The top five products of all time have different sales patterns.

The figure displays two heatmaps side-by-side, representing the relationship between product types (rows) and 12 categories (columns). The color scale on the right indicates the magnitude of the relationship, ranging from 0.0 (dark purple) to 1.0 (light yellow).

**Left Heatmap:** This heatmap shows a dense matrix of relationships. Many cells are colored in shades of purple, pink, and orange, indicating a strong relationship between the product types and the categories. The relationships are concentrated in the first 12 categories, with some weaker relationships in the remaining 12 categories.

**Right Heatmap:** This heatmap shows a sparse matrix of relationships. Most cells are dark purple (0.0), indicating no relationship. There are a few scattered cells of light yellow (1.0) and orange (0.8), indicating strong relationships between specific product types and categories.

**Color Scale:** The color scale on the right ranges from 0.0 (dark purple) to 1.0 (light yellow). The scale is marked at 0.0, 0.2, 0.4, 0.6, 0.8, and 1.0.

**Product Type List (Rows):** The product types listed on the left are: Accessories set, Alice band, Baby Bib, Backpack, Bag, Ballerinas, Beanie, Belt, Bikini top, Blazer, Blouse, Bodysuit, Bootie, Boots, Bra, Bra extender, Bracelet, Braces, Bucket hat, Cap, Cap/peaked, Cardigan, Chem. cosmetics, Coat, Costumes, Cross-body bag, Dog Wear, Dog wear, Dress, Dungarees, Earring, Earrings, Felt hat, Fine cosmetics, Flat shoe, Flat shoes, Flip flop, Garment Set, Giftbox, Gloves, Hair clip, Hair string, Hair ties, Hair/alice band, Hairband, Hat/beanie, Hat/brim, Headband, Heeled sandals, Heels, Hoodie, Jacket, Jumpsuit/Playsuit, Keychain, Kids Underwear top, Leggings/Tights, Long John, Mobile case, Necklace, Night gown, Nipple covers, Other accessories, Other shoe, Outdoor Waistcoat, Outdoor overall, Outdoor trousers, Polo shirt, Pumps, Pyjama bottom, Pyjama jumpsuit/playsuit, Pyjama set, Ring, Robe, Sandals, Sarong, Scarf, Shirt, Shorts, Shoulder bag, Side table, Skirt, Sleeping sack, Slippers, Sneakers, Socks, Soft Toys, Stain remover spray, Straw hat, Sunglasses, Sweater, Swimsuit, Swimwear bottom, Swimwear set, Swimwear top, T-shirt, Tailored Waistcoat, Tie, Top, Tote bag, Trousers, Umbrella, Underdress, Underwear Tights, Underwear body, Underwear bottom, Underwear corset, Underwear set, Vest top, Wallet, Watch, Waterbottle, Wedge, Weekend/Gym bag, Wireless earphone case, Wood balls.

**Category List (Columns):** The categories are numbered 1 through 12, corresponding to the columns in the heatmaps.

# GROUPING TYPE OF PRODUCTS

A

B

# Observations

1. Products in group A mostly sold well in September - February and products in group B mostly have high sales in around May - August
2. Customers bought more products in autumn-winter than in spring-summer.
3. There are type of products that sold well nearly all the time (e.g. hair ties, hair string, and keychain).

# Recommendation

To recommend products to customers, **consider new products** and when certain type of products will be in **high demand**. It is critical to generate recommendations **using the most appropriate data**.

# MARKET BASKET ANALYSIS

Market basket analysis (MBA) is a data mining technique.

The primary goal of MBA is to provide information to retailers in order to help them better understand their customers' purchasing habits, allowing them to make better-informed decisions.

## **SUPPORT**

Probability a product  
appears in transaction  
data

## **CONFIDENCE**

Probability customers purchase  
product B, given they have  
purchased product A.  
 $\text{Support}(A \& B) / \text{Support}(B)$

## **LIFT**

$\text{Support}(A \& B) /$   
 $\text{Support}(B) * \text{Support}(A)$

# Evaluation Metric

MEAN AVERAGE PRECISION @ 12 (MAP@12)

$$MAP@12 = \frac{1}{U} \sum_{u=1}^U \sum_{k=1}^{\min(n,12)} P(k) \times rel(k)$$

$P(K)$  = Precision at  $K$

$rel(K)$  = Rel at  $K$  (Indicator if the item at rank  $K$  is relevant)

# Recommendations

- In some months from March - August, the sales of products in group B didn't reach 50% of the highest sales of the products.
- To recommend products to customers, consider new products and when certain type of products will be in high demand. It is critical to generate recommendations using the most appropriate data.
- Offer special deals, product bundles based on the rules generated from the market basket analysis using previous month's data.
- Personalized product recommendations using hybrid recommendation system
